OBJECTIVE

Aspiring computer engineer seeking opportunities to apply and expand my skills in software development and machine learning. Eager to contribute to innovative projects in a dynamic environment while continuously learning and growing professionally.

WORK EXPERIENCE

Full Stack Web Developer Intern

Nexocide Private Limited, Remote

July 2024 – August 2024

- Built responsive and user-friendly web applications using **React.js**, **Next.js**, and **Firebase**.
- Collaborated with the team to design and implement secure authentication systems.

Technician

CommScope India Private Limited, Verna, Goa

May 2022 – September 2022

QUALIFICATION

- **B.E in Computer Engineering** – Agnel Institute of Technology and Design, Assagao (Graduating 2025)
- **Diploma in Electronics and Communication Engineering** – Govt. Polytechnic Bicholim, 81.8%
- **HSSC** – DMC Higher Secondary School, Mapusa, 61.3%
- **SSC** – St. Clara's High School, Assonora, 67.3%

STRENGTHS

Confident, Self-motivated, Punctual, Devotion to work

SKILLS

Programming Languages: C, C++, Python, Java

Web Development: HTML, CSS, JavaScript, PHP, React.js, Next.js, Tailwind CSS

Databases: MySQL, Firebase, MongoDB, PostgreSQL

PROJECTS

- **Water Level Indicator:** Developed a real-time monitoring system to measure water levels in tanks using sensors and microcontrollers. The project aids in preventing water wastage by providing timely alerts when the tank is full or empty.
- **Electronics Piano Circuit using 555 Timer:** Designed and implemented a simple electronic piano circuit that produces musical tones corresponding to button presses. The project demonstrates the use of the 555 timer IC in sound generation applications.
- **8x8x8 3D LED Cube:** Created a visually appealing 3D LED cube consisting of 512 LEDs, programmed to display dynamic lighting patterns. Used **microcontrollers** and **Arduino** for controlling LED sequences, showcasing advanced soldering and programming skills.
- **Library Management System:** Built a full-stack web application to manage library operations such as book inventory, user registration, and borrowing/returning records. Used **PHP** for back-end development and **MySQL** for database management.
- **Student Database Management System:** Developed a CRUD-based application to efficiently manage student data, including personal details, academic records, and attendance. Integrated **HTML**, **CSS**, **JavaScript**, and **MySQL** for an interactive user experience.
- **Traffic Sign Detection and Recommendations with Voice Alert:** Developed a real-time system using YOLOv8 and OpenCV to detect Indian traffic signs and provide voice alerts. Also built a mobile app using TensorFlow Lite and Android Studio for on-the-go detection and driver assistance.
- **Next.js Projects (Deployed):**
 - [Project 1 – Responsive UI Web App](#)
 - [Project 2 – Feature-rich Next.js App](#)
 - [Project 3 – Full-Stack To-Do List App](#)
